Employee of the Month

Desi Timms began her career at Golden living three years ago, working in dining services, where she has also received employee of the month recognition several times for her exceptional work. Soon after she has accepted a position of an aide in the Golden Living Care Department, and again for her outstanding work was promoted to a med tech position. She has always been a bright, articulate, energetic, and hard-working person.

She excels in all that she does. Desi has been asked to train new employees on numerous occasions. Her co-workers and Golden Living residents describe her as a positive, compassionated and reliable employee. Her enthusiasm and love for our residents comes through daily in all that she does. She refers to Golden Living as her happy place. "The residents are my world and my family," she says.

During her employment at Golden Living, Desi has demonstrated great critical thinking skills when it comes to making crucial decisions pertaining to the wellbeing of Golden Living Residents. She is highly organized and pays close attention to detail. Desi is not afraid to take an initiative to help her co-worriers, even in other departments, during her down time. Always with a smile she says, "what can I help you with today." She is an invaluable employee to Golden Living community. Thank you, Desi for all your hard work here at Golden Living Community.
